

How to setup ROW with Alternate Part Numbers

RO Writer Method						
Part#	Supplier	Description	Alternate #	QOH	Stock	
Primary 1 ABC123	WP	TEST PART	ABC123	1	S	
Primary 2 54321	WP	TEST PART	ABC123	0	NS	
Primary 3 123ABC	CQ	TEST PART	ABC123	0	NS	
Primary 4 321CBA	NA	TEST PART	ABC123	0	NS	
Primary 5 ABC123	FAST	TEST PART	ABC123	0	NS	

These are all SEPARATE parts in ROW

When searching for a specific part in ROW... or after exporting a part from WorldPac SpeedDial or another catalog, or by typing the number in manually, you will click the box next to "Alternate Number" then click the "Search Inv" button to force ROW search the Alternate field in your Inventory, which, in the example above is PN# ABC123. This will return a search result showing Primary #'s 1 through 5.

Editing Part on R.O. #0000001
